

Call for Abstracts

In order to foster interactive participation we are accepting Abstracts for short presentations for The State-of-the-Art in Facial Aesthetics Symposium – 2012. Two areas will be considered.

Website evaluation – We are seeking five presenters to submit their websites to be reviewed during live presentations. Accepted submissions will be limited to “2 minute presentations” as a tour of the website in PowerPoint format. Websites will be analyzed by experts who will note important attributes and make suggestions for improvement. This is a unique opportunity for non biased professional input and as well as a learning experience for the presenter, audience and speakers.

Case Presentations in Tracks #1 and #2

Track #1

Thursday, March 29th 6:20PM
